## SUMMARY

I am a web developer and currently a Final year software engineering student at Ho Chi Minh City University of Economics with a GPA of 3.0.

I started learning how to code and how to create beautiful website UI/UX in 2021. Over the years, I have developed useful skills and knowledge about web development

Hardworking, responsible, and competitive person. I look forward to meeting and working with all the amazing new people in the industry.

## TECHNICAL SKILLS

**Programming languages:** JavaScript & TypeScript

**Frameworks/Platforms:**

- JavaScript Frameworks: ReactJs, NextJs
- Tailwind CSS, SASS for styling
- Redux, Zustand, React Context Api for state management
- Auth: Clerk, Oauth, Nextauth
- UI: Radix UI, Shadcn UI, Bootstrap

**Others:**

- Using git for version control and code management
- Working with Figma designs
- Working with Rest Api
- Working with cloud platforms like Vercel, Netlify, and Firebase for hosting
- Working with serverless databases like PlanetScale, Firebase, Supabase, MongoDB Realm and ORM tools like Prisma and Drizzle

## EDUCATION

*University of Economics Ho Chi Minh city (Viet Nam) 09/2021 - Present*

- Studying **Software Engineer**
- Current **GPA 3.0/4.0**

## PROFESSIONAL EXPERIENCE

**07/2023 - Present**

**Project: Ecommerce dashboard** (1 members, personal study project)

- **Description:** a web application that e-commerce store owners use to oversee and manage their inventory, sales, and customer purchases.
- **Technologies:**
  - **Front-end:** NextJs 13, ReactJs, Shadcn UI, Tailwind Css

- **Back-end:** NextJs 13 App Router, Prisma Orm, PlanetScale MySQL Cloud Serverless server
- **Responsibilities:**
  - Completely build the website using the knowledge from all the coding classes.
  - Design website layout, UX/UI
  - Bring in a third-party Auth library(Clerk), designed middleware for all the api
  - Implement all functionalities (creating new product, new sale, new purchase , etc...)
  - Design database Schema, push and deploy to cloud server

- **Demo:** [heicha-admin-demo.vercel.app](https://heicha-admin-demo.vercel.app)

**06/2023 - 07/2023**

**Project: Music Share** (1 members, personal study project)

- **Description:** a website that allows users to submit and listen to a variety of songs, either from their own or others
- **Technologies:**
  - **Front-end:** NextJs 13, ReactJs, Radix UI, Tailwind Css
  - **Back-end:** NextJs 13 App Router, SupaBase PostgreSQL Cloud Serverless server
- **Responsibilities:**
  - Completely build the website using the knowledge from all the coding classes.
  - Design website layout, UX/UI
  - Bring in a third-party Auth library(SupaBase)
  - Implement all functionalities (users can upload and manage their own song, listen to all songs on the website, etc...)
  - Design database Schema, push and deploy to cloud server
- **Source:** [github.com/viekoi/MusicShare](https://github.com/viekoi/MusicShare)
- **Demo:** [music-share-nu.vercel.app](https://music-share-nu.vercel.app)

**01/2023 - 04/2023**

**Project: CMS Ecommerce website** (1 members, personal study project)

- **Description:** A e-commerce website for my friend's coffee shop, named Heicha Trà tinh tế
- **Technologies:**
  - **Front-end:** ReactJs
  - **Back-end:** FireBase Cloud Serverless server
- **Responsibilities:**
  - Completely build the website using the knowledge from all the coding classes.
  - Design website layout, UX/UI

- Implement all functionalities (users can go to a product page, sort the product list, add custom items to their shopping cart, and then check out, etc...)
  - Design database Schema, push and deploy to cloud server
- **Source:** [github.com/viekoi/tratinhte](https://github.com/viekoi/tratinhte)
- **Demo:** [heicha-97b11.web.app](https://heicha-97b11.web.app)
